Application No. 10/622,341

## AMENDMENTS TO THE SPECIFICATION:

Please substitute the following amended title for the pending title beginning on page 1, line 4:

## PHOTOCONDUCTIVE MEMBERS FLUOROPOLYMER CONTAINING PHOTOCONDUCTIVE MEMBER

Please substitute the following amended paragraph for the pending paragraph beginning on page 1, line 7:

Illustrated in copending U.S. Serial No. 10/369,797 U.S. Patent 6,800,411, filed February 19, 2003 on Photoconductive Imaging Members, the disclosure of which is totally incorporated herein by reference, is, for example, a photoconductive imaging member comprised of a substrate, a photogenerating layer, and a charge transport layer containing a binder and a multi-(methyl)acrylate.

Please substitute the following amended paragraph for the pending paragraph beginning on page 1, line 13:

There is illustrated in copending U.S. Serial No. 10/370,186, filed February 19, 2003 on Photoconductive Imaging Members, <u>Publication No. 20040161683</u>, the disclosure of which is totally incorporated herein by reference, a photoconductive imaging member comprised of a supporting substrate, a hole blocking layer thereover, a crosslinked photogenerating layer and a charge transport layer, and wherein the photogenerating layer is comprised of a photogenerating component and a vinyl chloride, allyl glycidyl ether and hydroxy group containing polymer.

Application No. 10/622,341

Please substitute the following amended paragraph for the pending paragraph beginning on page 1, line 21:

There is illustrated in copending U.S. Serial No. 10/369,816, filed February 19, 2003 on Photoconductive Imaging Members, <u>Publication No. 20040161684</u>, the disclosure of which is totally incorporated herein by reference, a photoconductive imaging member comprised of a hole blocking layer, a photogenerating layer, and a charge transport layer, and wherein the hole blocking layer is comprised of a metal oxide; and a mixture of phenolic compounds and a phenolic resin wherein the phenolic compound contains at least two phenol groups.

Please substitute the following amended paragraph for the pending paragraph beginning on page 1, line 29:

There is illustrated in copending U.S. Serial No. 10/369,812 U.S. Patent 6,824,940, filed February 19, 2003 on Photoconductive Imaging Members, the disclosure of which is totally incorporated herein by reference, is a photoconductive imaging member comprised of a hole blocking layer, a photogenerating layer, a charge transport layer, and thereover an overcoat layer comprised of a polymer with a low dielectric constant and charge transport molecules.
